

What is claimed is:

- 28 7
- 1 1. An Internet accessible communication apparatus comprising:
2 a controller for commanding a server to transmit parking lot occupancy data
3 corresponding to at least one parking lot through the Internet to a remote display
4 device, said parking lot occupancy data capable of being reproduced by the remote
5 display device as a real-time representation of the parking lot indicating at least
6 locations of vacant parking spaces within the parking lot.
 - 1 2. The apparatus of claim 1, wherein said controller commands the server to
2 transmit parking lot occupancy data corresponding to a plurality of parking lots.
 - 1 3. The apparatus of claim 1, wherein the real-time representation indicates
2 locations of occupied parking spaces.
 - 1 4. The apparatus of claim 1, wherein the real-time representation indicates
2 locations of reserved parking spaces.
 - 1 5. The apparatus of claim 1, wherein the real-time representation is a textual
2 listing.
 - 1 6. The apparatus of claim 1, wherein the real-time representation is a graphical
2 map.
 - 1 7. The apparatus of claim 1, wherein the real-time representation is a video
2 image.
 - 1 8. The apparatus of claim 1, wherein the real-time representation is an Internet
2 Web page.
 - 1 9. A communication method comprising the step of:
2 transmitting parking lot occupancy data corresponding to at least one
3 parking lot through the Internet to a remote display device, said parking lot occupancy
4 data capable of being reproduced by the remote display device as a real-time
5 graphical representation of the parking lot indicating vacant and occupied parking
6 spaces within the parking lot.
 - 1 10. The method of claim 9, wherein parking lot occupancy data corresponding
2 to a plurality of parking lots is transmitted.
 - 1 11. The method of claim 9, wherein the real-time representation indicates
2 locations of occupied parking spaces.
 - 1 12. The method of claim 9, wherein the real-time representation indicates
2 locations of reserved parking spaces.
 - 1 13. The method of claim 9, wherein the real-time representation is a textual

1. The first of the two main parts of the book is devoted to the study of the history of the English language. It begins with a chapter on the prehistoric period, followed by chapters on Old English, Middle English, and Modern English. The second part of the book is devoted to the study of the English language in the present day. It begins with a chapter on the English language in the United States, followed by chapters on the English language in the United Kingdom, the English language in the Commonwealth, and the English language in the world.
